Meyer’s Responses | Darwin's Doubt

Comment on “Darwin’s Doubt,” by Stephen C. Meyer I highly recommend reading this book. it isn't an easy read, but very interesting and well worth reading with an open mind. When Darwin wrote his famous 1859 treatise on the Origin of Species, there were two issues he glossed over: 1.) The origin of the first living cell, and 2.)

Amazon.com: Darwin's Doubt: The Explosive Origin of Animal ...

“Stephen C. Meyer’s Darwin’s Doubt is a truly remarkable book. Within its 413 pages of text are four tightly woven interrelated arguments. Using 753 references, he presents evidence associated with the serious weaknesses of materialistic theories of biological

evolution, and positive evidence for the theory of intelligent design.”
