EZGO Golf Cart Engine and Gas System Troubleshooting Table. Find how to diagnose your golf cart engine problems in this EZGO Golf cart engine troubleshooting section. Inspect and adjust if no "click" is heard. Replace if faulty. Inspect for damage and continuity.

Check your tire pressure to be sure it is at the proper level. E-Z-Go electric carts with low tire pressure will experience an increased load on the batteries which will slow you down and decrease the distance you can drive before recharging. Inflate tires to 18 to 22 PSI. Step 4

The battery charger and the controller are both sources of electrical drain. Unplug the battery charger DC plug from the vehicle receptacle. On PDS vehicles, disconnect the controller from the battery set by selecting the 'TOW/ MAINTENANCE' position on the RUN-TOW/MAINTENANCE SWITCH located under the passenger seat.

Wiring Problems: Loose wiring or a wire that's damaged can definitely cause the EZGO RXV to not move. It could be the wire that's connected to the batter or to the tow run switch. Brake Problems: Many times the reason your RXV won't move is because of brake problems. The RXV is designed to be disabled when there is a problem with the break.
