15RKCNC - JUSTICE KARTER

Collection of the Public Record Office close rolls, relating to the monarchs of Great Britain from 1272-1509

Global Development and Human Security explores the possibility of connecting all countries to the global economy while defusing the social tensions and managing the security risks that can result from exposure to a turbulent international system. The complex intersection between security and development policies has not been adequately mapped or explored. Frail and failing states that lack sound market and security institutions are the weak links in an interconnected global system. Yet aid allocation principles discourage engagement with these "difficult partners," and the insular culture of development assistance hinders interaction with the security community. In a world beset by "problems without passport" (infectious diseases, environmental pollution, international crime, conflict spillovers, terrorism, etc.), a new paradigm should supplant the now obsolete development consensus. The authors took stock of current development practices through the prism of Sweden's Shared Responsibility bill, which addresses peace, security, opportunity, environmental conservation, human rights, and democracy. The resulting volume draws the implications of emerging threats to global peace and prosperity for development policy and practice. It seeks to build bridges of understanding between the development community and the security establishment by bringing together lessons of experience currently scattered in the literature. Each chapter is self-contained and includes policy findings and recommendations. The book is principally aimed at practitioners who need up-to-date knowledge about security and development issues. Publication of this paperback edition makes the book available for use as an introductory text for security specialists with little knowledge of development or for development specialists with limited knowledge of security, or for college or university students in these areas.

It's All Who You Know When Working the System Here's How to Get to Know the Right People The world's attention turned to the U.S. Capitol on January 20, 2009, when Barack Obama took the Presidential oath of office. But inside the building, changes had already taken place that would have broad implications for his agenda. The 111th Congress had convened on January 6 with a far stronger Democratic majority than the one that had preceded it. Their ambitious legislative agenda requires the assistance of their staffs to prepare them for all the important issues on the legislative table.

Thus, it is more important than ever to know about senior congressional committee staff members and the role they play in shaping today's legislation. While members of the House of Representatives and the Senate enact laws, it is often their staffers who exert the greatest influence in the law-making process. Staffers advise their elected bosses, establish political positions on issues, craft legislation, put policies in place, and play important roles on scores of congressional committees. The next time you need to find out who is the most effective person to advocate your cause, turn to the Insider's Guide for all the answers. Concern about the threat posed by nuclear weapons has preoccupied the United States and presidents of the United States since the beginning of the nuclear era. Nuclear Security draws from papers presented at the 2013 meeting of the American Nuclear Society examining worldwide efforts to control nuclear weapons and ensure the safety of the nuclear enterprise of weapons and reactors against catastrophic accidents. The distinguished contributors, all known for their long-standing interest in getting better control of the threats posed by nuclear weapons and reactors, discuss what we can learn from past successes and failures and attempt to identify the key ingredients for a road ahead that can lead us toward a world free of nuclear weapons. The authors review historical efforts to deal with the challenge of nuclear weapons, with a focus on the momentous arms control negotiations between U.S. president Ronald Reagan and Mikhail Gorbachev. They offer specific recommendations for reducing risks that should be adopted by the nuclear enterprise, both military and civilian, in the United States and abroad. Since the risks posed by the nuclear enterprise are so high, they conclude, no reasonable effort should be spared to ensure safety and security.
