Book, a Writing Workshop print Student book, enhanced digital editions of each and free Teacher's Resources.

Social capital is a principal concept across the social sciences and has readily entered into mainstream discourse. In short, it is popular. However, this popularity has taken its toll. Social capital suffers from a lack of consensus because of the varied ways it is measured, defined, and deployed by different researchers. It has been put to work in ways that stretch and confuse its conceptual value, blurring the lines between networks, trust, civic engagement, and any type of collaborative action. This clear and concise volume presents the diverse

theoretical approaches of scholars from Marx, Coleman, and Bourdieu to Putnam, Fukuyama, and Lin, carefully analyzing their commonalities and differences. Joonmo Son categorizes this wealth of work according to whether its focus is on the necessary preconditions for social capital, its structural basis, or its production. He distinguishes between individual and collective social capital (from shared resources of a personal network to pooled assets of a whole society), and interrogates the practical impact social capital has had in various policy areas (from health to economic development). Social Capital will be of immense value to readers across the social sciences

and practitioners in relevant fields seeking to understand this mercurial concept.

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision. Written for the OCR AS/A Level Mathematics specifications for first teaching from 2017, this print Student Book covers the content for AS and the first year of A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

Key content coverage is combined with practical

tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes, every student can:

- Plan and manage a successful revision programme using the topic-by-topic planner
- Consolidate their knowledge by working through clear and focused coverage of the OCR GCSE Economics specification
- Test understanding and identify areas for improvement with regular 'Check your understanding' activities and answers, plus end-of-topic 'I can' checklists
- Improve exam technique through practice questions, expert tips and examples of typical mistakes to avoid
- Revise, remember and accurately use key economics terms with definitions throughout for quick and easy reference

With its closely aligned content and structure, this textbook will equip your students for the refreshed OCR A-level and AS Economics specifications.

- All new practice questions at the end of each chapter, featuring multiple choice, stimulus and essay questions
- New knowledge check question feature, testing student understanding throughout
- New case studies, facts and figures

and practical exercises reflecting recent economic developments - Charts and graphs to give students a strong grounding in economic theory and strengthen their skills in applying those concepts at A-level

- Manageable learning objectives matched to the specification and summaries of the key findings at the end to encourage students to take control of their study

We are seeking endorsement from OCR for the Student Textbook and Student eTextbook.

This textbook is endorsed by OCR for use with the OCR GCSE Home Economics: Food and Nutrition specification. Packed with the information that students need for their course, it presents the key areas of knowledge in an accessible, uncomplicated and concise fashion. Illustrated with photos and pictures throughout, it includes:

- differentiated activities to support higher and lower ability students; exam practice questions (with mark schemes) to support the food and nutrition unit; a chapter on coursework preparation (for the short tasks and Food Study task); and up-to-date coverage of topics such as genetically modified food, fair trade issues and food legislation.

Additional material for teachers is available at www.hodderplus.co.uk/foodandnutrition.

'Expo' provides total support for the AQA specification with motivating resources and a strong focus on controlled assessment and exam preparation from day one.

tanding' activities and answers, plus end-of-topic 'I can' checklists - Improve exam technique through practice quest.

Developed to follow on from the increasingly popular Expo for Key Stage 3, this motivating new course offers fresh approaches and seamless progression from Year 9 for optimal results at GCSE.

The one-stop shop for all your Business requirements, this book provides teachers with the complete reassurance that they have everything they need to deliver AQA's new GCSE Economics specification. The best possible exam preparation with printed assessment materials including exam-style questions, specimen answers and study tips. Prepare your students for the examination with exemplars to help develop the skills required. Practical approach, with case studies to contextualise each subject in a highly visual way. 'Learning Objectives' clearly referenced to the AQA specification let students know exactly what they need to learn and understand in each topic. Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating

markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

Oxford English for Academic Purposes offers a specialist course covering

listening, speaking and reading in key areas of academic life such as lectures, presentations and textbooks. The course is consistent with levels A2 to C1 of the Common European Frame of Reference for the teaching of foreign languages.
