What is the relationship between how cities work and what cities mean? *Spatial Cultures: Towards a New Social Morphology of Cities Past and Present* announces an innovative research agenda for urban studies in which themes and methods from urban history, social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries. The collection confronts the recurrent epistemological impasse that arises between research focussing on the description of material built environments and that which is concerned primarily with the people who inhabit, govern and write about cities past and present. A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience. Drawing on a wide range of historical and contemporary urban case studies, as well as a selection of theoretical and methodological reflections, the contributions to this volume seek to historically, geographically and architecturally contextualize diverse spatial practices including movement, encounter, play, procession and neighbourhood. The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences.

Around the common law world, the law of judicial review of administrative action has changed dramatically in recent decades, accelerating a centuries-long process of incremental evolution. This book offers a fresh framework for understanding the core features of contemporary administrative law. Through comparative analysis of case law from Australia, Canada, England, Ireland, and New Zealand, the author develops an interpretive approach by reference to four values: individual self-realisation, good administration, electoral legitimacy, and decisional autonomy. The interaction of this plurality of values explains the structure of the vast field of judicial review of administrative action: institutional structures, procedural fairness, substantive review, remedies, restrictions on remedies, and the scope of judicial review. Addressing this wide array of subjects in detail, the book demonstrates how a pluralist approach, with the values being employed in a complementary and balanced fashion, can enhance our understanding of administrative law. Furthermore, such an approach can guide the future development of the law of judicial review of administrative action, a point illustrated by a careful analysis of the unsettled doctrinal area of legitimate expectation. The book closes by arguing that the author's values-based, pluralist framework supports the legitimacy of contemporary administrative law which, although sometimes called into question, facilitates the flourishing of individuals, of public administration, and of the liberal democratic system.

Despite its small size, Trinidad and Tobago ranks highly on a number of economic development indicators. According to estimates by the IMF, per capita income in T&T was \$21,310 in 2014, the third-highest level in the Americas, after the US and Canada. Meanwhile, the World Bank categorises T&T as a high-income, non-OECD nation, while the World Economic Forum (WEF), in its reports on global competitiveness, sees T&T as an innovation-driven economy, like the US or the UK.

This book analyses the relationship between Pakistan and China in the post 9/11 period against the backdrop of Pakistan's domestic politics and proposes that the major source of continuity in the ties between the two countries is represented by the military. The

evolution and continuity of Sino-Pakistani relations are explored through three timely case studies: the port of Gwadar, where Chinese investment well pre-dates the advent of the Belt and Road Initiative; the China-Pakistan Economic Corridor, the "flagship project" of China's global ambitions; and how the relationship between China and Pakistan has played out in Afghanistan. The book assesses the extent of military influence in Pakistan's relations with China throughout the last 20 years in several key decision-making areas, ranging from internal security to elite recruitment. By looking at the extent of military prerogatives in Pakistan's domestic politics, the book reveals how the major source of continuity in the ties between the two countries was represented by the role that the military has played overtime. While since the announcement of the BRI elected representative have gained some leverage in decision-making, the military has invariably been the main port of call even under a civilian dispensation. A novel approach to the study of Sino-Pakistani relations, this book will be of interest to academics working on South Asian Politics, Chinese Politics and International Relations, Sino-Pakistani relations, civil-military ties, and China's role in Asia including the One Belt, One Road initiative.

This book assesses the UN Peace Operations in Haiti and establishes what lessons should be taken into account for future operations elsewhere. Specifically, the book examines the UN's approaches to security and stability, demobilisation, disarmament and reintegration (DDR), police, justice and prison reform, democratisation, and transitional justice and their interdependen-

cies through the seven UN missions in Haiti. Drawing on extensive fieldwork and interviews conducted in Haiti, it identifies strengths and weaknesses of these approaches and focuses on the connections between these different sectors. It places these efforts in the broader Haitian political context, emphasises economic development as a central factor to sustainability, provides a civil society perspective, and discusses the many constraints the UN faced in implementing its mandates. The book also serves as a historical account of UN involvement in Haiti, which comes at a time when the drawdown of the mission has begun. In an environment where the UN is increasingly seeking to conduct security sector reform (SSR) within the context of integrated missions, this book will be a valuable contribution to the debate on intervention, UN peace operations and SSR. This book will be of interest to students of peace operations and peacekeeping, conflict studies, security studies and IR in general.

The study of white-collar crime remains a central concern for criminologists around the world and research concentrates on its nature, prevalence, causes and responses. However, most books on white-collar crime tend to focus on Anglo-American examples, which is surprising given the amount of rich data and research taking place in mainland Europe. This new handbook seeks to reset the balance and, for the first time, presents an overview of state-of-the-art research on white-collar crime in Europe. Adding to the existing Anglo-American body of knowledge, the Handbook will discuss specific European topics and typical European features of white-collar crime. The Routledge Handbook of White-Collar and Corporate Crime in Europe consists of more than thirty chapters on topics ranging from the Icelandic Banking Crisis, to the origins of the study of white collar crime, to contemporary topics, such as white-collar crime in countries post-transition from communist regimes; the illegal e-waste trade and white-collar crime in professional football. Furthermore, the book contains extensive case study analyses of landmark European cases of white-collar crime. The editors have gathered together the leading voices in the field and a final section offers commentaries on white-collar crime in Europe from eminent criminologists David Friedrichs and Hazel Croall. This Handbook will thus serve as a work of reference for all scholars and students engaged in the study of corporate and white-collar crime and will also set out directions for new research in the future.

This is the first book to look at women in policing in the mainland of the People's Republic of China. Informed by empirical data as

well as rich secondary information drawn from a wide range of published materials, and written by a former police officer in China, this book offers a detailed discussion of key issues concerning women in the Chinese police. Mainly drawing on face-to-face interviews with police officers and student probationers in multiple force areas, Women Police in Contemporary China offers rich insights into women's lives in Chinese policing. The book first discusses how Chinese women were introduced to the male-only organisation and their representation in the Chinese police today. It elaborates women's experiences as female officers in the police and, more specifically, their everyday work, contributions to policing, women police's own perceptions of their roles and positions in the police profession and the gendered challenges and concerns facing them. It also looks at police occupational culture from a gendered lens. This book is illuminating reading for all those engaged in policing studies, gender and justice, policymaking, comparative criminal justice and all those interested in a woman's role in the Chinese police.

The recorded use of deadly force against unarmed suspects and sustained protest from the Black Lives Matter movement, among others, have ignited a national debate about excessive violence in American policing. Missing from the debate, however, is any discussion of a factor that is almost certainly contributing to the violence—the use of anabolic steroids by police officers. Mounting evidence from a wide range of credible sources suggests that many cops are abusing testosterone and its synthetic derivatives. This drug use is illegal and encourages a "steroidal" policing style based on aggressive behaviors and hulking physiques that diminishes public trust in law enforcement. Dopers in Uniform offers the first assessment of the dimensions and consequences of the felony use of anabolic steroids in major urban police departments. Marshalling an array of evidence, John Hoberman refutes the frequent claim that police steroid use is limited to a few "bad apples," explains how the "Blue Wall of Silence" stymies the collection of data, and introduces readers to the broader marketplace for androgenic drugs. He then turns his attention to the people and organizations at the heart of police culture: the police chiefs who often see scandals involving steroid use as a distraction from dealing with more dramatic forms of misconduct and the police unions that fight against steroid testing by claiming an officer's "right to privacy" is of greater importance. Hoberman's findings clearly demonstrate the crucial need to analyze and expose the police steroid culture for the purpose of formulating a public policy to deal with its dysfunctional effects.

This edition provides research and information on all aspects of crime prevention, including the physical environment and crime, neighborhood crime prevention programs, community policing, crime in schools, and electronic monitoring and home confinement. This book examines communication between police and residents of a designated crime 'hotspot' community in the Global South. It looks at communicative realities within a marginalised community in the twin island republic of Trinidad and Tobago and explores how police and the individuals that they police purposefully assign categories to each other before, during and after interactions. It also examines the relations between the police and the community and how power is manifested through authored or assigned labels, stigmas and stereotypes. Overall, it suggests alternative strategies to address problematic police and community relations and provides another standpoint from which communicative redress between police and residents of marginalized communities in the Global South can be approached.

It is commonly asserted that bills of rights have had a 'righting' effect on the principles of judicial review of administrative action and have been a key driver of the modern expansion in judicial oversight of the executive arm of government. A number of commentators have pointed to Australian administrative law as evidence for this 'righting' hypothesis. They have suggested that the fact that Australia is an outlier among common law jurisdictions in having neither a statutory nor a constitutional framework to expressly protect human rights explains why Australia alone continues to take an apparently 'formalist', 'legalist' and 'conservative' approach to administrative law. Other commentators and judges, including a number in Canada, have argued the opposite: that bills of rights have the effect of stifling the development of the common law. However, for the most part, all these claims remain just that - there has been limited detailed analysis of the issue, and no detailed comparative analysis of the veracity of the claims. This book analyses in detail the interaction between administrative and human rights law in Australia and Canada, arguing that both jurisdictions have reached remarkably similar positions regarding the balance between judicial and executive power, and between broader fundamental principles including the rule of law, parliamentary sovereignty and the separation of powers. It will provide valuable reading for all those researching judicial review and human rights.
