Abstract. A representation is a thing that can be interpreted as providing information about something: a map, or a graph, for example. This book is about the expanding world of computational representations, representations that use the power of computation to provide information in new forms, and in new ways.

The Mix That Matters: Innovation Through Diversity

Diversity and inclusion in the workplace can improve a company's reputation in the community and therefore can be responsible for the generation of more. Diversity and Inclusion allows an organization to see things from different points of view allowing more robust ideas to exist and generate.

Innovation in Multidisciplinary Collaborations An important claim favoring multidisciplinary collaborations is that they promote innovation. We define innovation as the successful implementation of creative ideas, tasks, or procedures (Amabile, 1988). In science and engineering, innovations are technical discoveries or insights, new ways to
